EXPERIENCE

Meta

Menlo Park, California

Production Engineer, Infrastructure (IC3)

Jul 2025 – May 2026

- Designed and built an **AI-powered automation system** using Python and LLM integration that reduced manual engineering toil by an estimated **1-2 hours per week**, enabling engineers to focus on higher-impact work across **87 global edge PoP locations**.
- Developed **full-stack features** (React/Python) for an internal scheduling platform – improved query performance, embedded contextual data into the UI, and extended scheduling logic to support concurrent operations across **87 global edge PoP locations**, increasing throughput by **2–4x**.
- Led end-to-end **system consolidation** of historical infrastructure data into a modern unified platform, improving query efficiency and schema design with zero data loss.
- Partnered with cross-functional teams worldwide to **build disaster response plans** for platforms serving **3+ billion daily active users** across Facebook, Instagram, WhatsApp, and Messenger.

Amazon

Toronto, Ontario

Software Development Engineer Intern

May 2024 – Aug 2024

- Enhanced **ADAPT's Inactive Time Report** by developing APIs with **Java** using object-oriented design principles, improving workflow for area managers and associates across **North America**.
- Built and integrated distributed **UI components** with **Angular.js** deployed on **AWS**, benefiting **3,000+ managers** and **1.3 million+ associates** by optimizing multi-tiered systems for efficiency.
- Implemented **optimization techniques** in API response times, improving load speed by **20%**, enhancing user satisfaction and efficiency.
- Conducted **20+ code reviews** focusing on design patterns and best practices, fostering adherence to coding standards and increasing overall code quality.

TD Bank

Toronto, Ontario

Software Engineering Intern – Backend Engineer

May 2023 – Dec 2023

- Developed a **Java** automation tool reducing manual processing by **50%** and errors by **30%**.
- Built and maintained **RESTful APIs** with **Spring Boot**, improving system integration and performance, leading to a **20% reduction in response times**.

Scotiabank

Toronto, Ontario

Software Development Engineer Intern

Jan 2023 – Apr 2023

- Developed and optimized **React** components for the customer portal, improving accessibility and increasing **user engagement by 30%**.
- Implemented **lazy loading**, **memoization**, and optimized state management, reducing page load times by **25%**.

EDUCATION

McMaster University

May 2025

Computer Engineering (Co-op) B.A.Sc. GPA: 3.8/4.0

Hamilton, Ontario

- Relevant Coursework:** Data Structures and Algorithms, Advanced Computer Networking and Security, Fundamentals of Machine Learning.
- Honors/Awards:** Golden Key International Honor Society (2022), Dean's Honor List (2020–2024), President's Scholarship (2020).

SKILLS

Languages: Python | Java | JavaScript | React | PHP | C/C++ | Bash

Infrastructure & Networking: Distributed Systems | Load Balancing | CDN | Edge Computing | Disaster Recovery | Incident Response | Network Traffic Engineering | Observability & Monitoring

AI & Automation: AI-Accelerated Development | LLM Integration | Automated Oncall Investigation

Cloud & Platforms: AWS | Google App Engine | Kubernetes | Linux/Unix | CI/CD

Databases: SQL | PostgreSQL | MongoDB | DynamoDB

Tools: Git | GraphQL | REST APIs
